Summary

I'm a software developer proficient in JavaScript, ReactJS, and HTML and CSS. I have seven years of experience in various facets of consumer technologies which has allowed me to gain a well-rounded understanding of the current technological landscape while allowing me to discover my interest in the creation of consumer software. I also have a strong background in hardware and software troubleshooting and repair.

Skills

Skills: Hardware Troubleshooting, Software Troubleshooting, Hardware Diagnostics, Front-End JavaScript, Back-End JavaScript, Express, ReactJS, Node.JS, NPM, jQuery, HTML5, CSS, PostgreSQL, Git, GitHub, GitBash

Tools: Wix, SquareSpace, Wordpress, Unity, Unreal 4, Asset Forge, Galaxy Diagnostic Tool

Recent Projects

VapoRun |

- Designed and built a small mobile game which utilizes endless 2D gameplay and fully modelled 3D custom assets.
- Built using C#, Unity Engine, and Asset Forge.
- Handled every aspect from coding to asset creation.
- Currently migrating project for live release on iOS devices.

Movie Ouija | [Project Link](#)

- Designed and built a program which randomly selects a movie to watch from a user's custom database.
- Built using ReactJS, Express, Node, HTML and CSS.
- Handled every stage of the app from concept to implementation. This meant designing a JWT-Authentication system.

Noteful | [Project Link](#)

- Built functionality for a note-taking app.
- Created using ReactJS, Express, Node, HTML, and CSS.
- Developed the front-end component for this program as part of a class assignment.
